

## Key Instant Recall Facts

### Year 1 – Autumn 1

I know the number bonds to 5.

Number bonds show us how numbers join together. They are very important for addition and subtraction. This half term, the children will be learning number bonds that make 5; they should be able to recall these independently.

### What can this look like?

#### Concrete:

#### Pictorial:

#### Abstract

2 and 3 make 5

$$2 + 3 = 5$$

$$5 - 2 = 3$$

### Things to Try:

**Everyday Objects-** Gather together 5 objects and separate them in as many different ways as possible, write the calculation to match each one.

**Bubble numbers-** Write the numbers 1-5 on large pieces of paper, shout out a number 1-6 and then ask your child to blow bubbles at the right number to make 5.

**Bunny ears-** Decide on a number to make. Put your hands on your head as 'ears' and challenge your child to make 5, e.g. show two fingers on one hand and 3 on the other.

### Questions to ask at home:

What do we need to **add** to 4 to make 5?

If I have 1, **how many more** do I need to get to 5?

What is the **difference** between 5 and 3?

### Key vocabulary:

What is 3 **add** 2?

What is 4 **plus** 1?

What is 5 **take away** 4?

What is 1 **less than** 5?

### Top Tips

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.
